## WMI Announces Availability of the FUJI FDR ES Panel Line

For the past 3 months WMI has been shipping the Fuji FDR ES Panel on a limited basis. This has given us time to work with Fuji's newest offering and to ramp up our tech support in order to support your efforts in the field. WMI is pleased to announce that we are now ready to sell and support the complete FDR ES line.

In addition to several new individual models including 24x30 Cesium Fuji is now offering a 14x17 and a 17x17 Cesium. All ES panels are "wireless capable" whether or not they are initially purchased as part of a wireless or tethered package. This means that any ES panel can be converted to wireless at any time.

The FDR ES carries a 2 Year Warranty and several new design features including: lighter weight, carbon fiber edges and an IPX3 rating for resistance to liquids.
