February 13, 2020

Date Change: Fuji Training 2020 Fuji FDX Field Connectivity Course

As the Fuji product line continues to evolve, we have updated our training classes to keep pace. The FDX Console remains the heart of the Fuji digital platform, but today it is used to run many modalities such as: AQRO Portable, GL Long Length DR, CR and of course the FDR ES Panel. Also, how the FDX communicates with networks and PACS continues to be a required skill.

Our classes focus on the real world skills that dealers need to sell and service the Fuji systems efficiently and profitably. Our classes help our dealers to distinguish themselves by ensuring that they have the know how to help their customers get the most from their Fuji digital systems.

In addition to our previously announced programs for March we have added the following:

Fuji FDX Field Connectivity Course

Class will begin	Tuesday	March 24, 2020	8:00 AM
Class will end	Thursday	March 26, 2020	5:00 PM

If you would like to obtain additional details or have a specific question about these programs, please contact:
