

## KEEPING PROPERTIES FRC CHEMICAL PRODUCTS

The figures given are only guidelines developed from experience. The projected life values for these products are for chemicals stored in their unopened, *original* containers at temperatures between 18° and 21°C (65° to 70° F). This shelf life lessens with storage at higher temperatures. The packaging date for FRC products is stamped on the outer case. Proper control and rotation of chemical inventory is a standard recommendation in the industry.

### **Concentrates**

<b>Item #</b>	<b>Description</b>	<b>Shelf life</b>
F-44-506	Eco Plus Developer	1 Year
F-44-504ES	HIC-ES Developer	1 Year
F-44-640	Universal Fixer	2 Years

#### **Manufacture Date printed on bottles, cartons and related containers**

### **Ready-To-Use**

2500DF	MED-DENT Developer /Fixer	1 Year
2501D	MED-DENT Developer	1 Year
2502F	MED-DENT Fixer	1 Year

#### **Manufacture Date printed on bottles and cartons**
